Professional Summary

Third-year Information Technology undergraduate at the University of Moratuwa seeking a Software Engineering Internship. Experienced in software development, including full-stack web and mobile application development through academic and personal projects. Strong interest in artificial intelligence and cloud technologies, with a passion for building practical, scalable, and user-focused software solutions. Eager to continuously learn new technologies, strengthen technical skills, and contribute effectively in collaborative team environments.

Education

University of Moratuwa Mar 2024 – Present

BSc (Hons) in Information Technology | CGPA: 3.62

- *Relevant Coursework:* Software Engineering | Object Oriented Programming | Database Management | Statistics | Networking | Data Structures & Algorithms

Experience & Volunteering

MoraSpirit Organisation Apr 2025 – Present

Web & Technology Pillar Member

- Collaborated in a team on real-world projects, gaining hands-on software development experience solving practical problems
- Contributed to building and maintaining web platforms for the university community

Rotaract Club of University of Moratuwa

Company Coordinator – Flagship Career Fair (Are You Ready?)

IEEE Women in Engineering (WIE) – University of Moratuwa

Delegates Committee Member – Hackelite 2.0

Certificates & Achievements

- Python Programming Course (UoM – Open Learning Platform)
- Web Design for Beginners (UoM – Open Learning Platform)
- Hackathon Participant – MoraXtreme 10.0 & JapuraXtreme 2.0

Notable Projects

Unify – University Social & Learning Platform Oct 2025 – Aug 2026

React.js, Node.js, Express.js, PostgreSQL, Sequelize, Tailwind CSS, Docker, AWS GitHub | Live Demo

- Developed a multi-role university news feed with pagination and post interactions, including likes, comments, and saved posts.
- Implemented an automated Lost & Found matching system using TF-IDF vectorization and cosine similarity to identify potentially matching reports.
- Built a centralized notification system with database-backed records and contextual navigation to relevant posts and items.
- Designed system workflows using UML diagrams and responsive UI components in Figma; contributed to backend integration and automated testing.

Epilogue Quiz – Interactive Competition Platform Jun 2026 – Jul 2026

Next.js, TypeScript, React, Tailwind CSS, Prisma, MySQL, Redis, JWT GitHub | Live Demo

- Developed authentication workflows and responsive interfaces for a level-based competition platform serving 300+ registered users.
- Implemented database access and user authorization workflows using Prisma ORM and MySQL.
- Developed a real-time leaderboard using Redis and SQL query optimization to support live ranking updates.

Green Cycle LK – AI-Powered Waste Management Platform Sep 2026 – Present

Java 17, Spring Boot 3, React, TypeScript, PostgreSQL, JWT, Docker, Python

- Developing resident management features, including JWT-based authentication, resident profiles, dashboards, and waste collection schedules.
- Integrating an AI-powered waste classification service to provide waste identification and disposal guidance.
- Developing searchable waste information APIs and database components to support recycling guidance across multiple waste categories.
- Collaborating on frontend-backend integration, Docker-based workflows, testing, and shared codebase maintenance.

SortMaster – Automated QR-Based Object Sorting System Aug 2024 – Aug 2025

Python, OpenCV, Pyzbar, Raspberry Pi 4B, Arduino Uno, EasyEDA, Web App

- Engineered an automated sorting system using OpenCV and Pyzbar for real-time QR detection and 6-DOF robotic arm pick-and-place operations
- Designed a custom PCB in EasyEDA and integrated motor controllers (A4988, PWM I^2C) via Raspberry Pi 4B and Arduino Uno
- Developed a live web dashboard to stream and monitor real-time category-wise sorting metrics

Technical Skills

Programming Languages: Java, JavaScript, TypeScript, Python, C
Frontend Development: React, Next.js, HTML, CSS, Tailwind CSS, Bootstrap
Backend Development: Node.js, Express.js, Spring Boot, FastAPI, REST APIs
Databases & ORM: PostgreSQL, MySQL, MongoDB, Prisma, Sequelize
DevOps & Cloud: Linux, Git, GitHub, Docker, CI/CD, AWS
Testing & API Tools: Postman
Design & Collaboration: Figma, ClickUp
